# 700 MHZ BROADBAND FOR MISSION CRITICAL PUBLIC SAFETY DATA

A BRIEF OVERVIEW AND CALL TO ACTION!

PRESENTATION AT THE FOURTH CANADIAN PUBLIC SAFETY INTEROPERABILITY WORKSHOP

#### **Present State of Broadband in Canada**

- Different technology in use
- Different systems in use
- Not seamless countrywide
- No Canada-U.S. harmonization
- Thirst for bandwidth increasing exponentially
- Industry Canada Consultation provides opportunity to state public safety needs

Working together to improve public safety interoperability...

INTRODUCTIO

**CURRENT SITUATION** 

#### Why do we care?

- The allocation of 700MHz broadband spectrum represents a once in a lifetime opportunity
- If done correctly will enable **mission critical data communications for public safety** for years to come
- Having this ability directly impacts community and responder safety, innovation and the health of Canada's digital economy
- We need the right tools to protect and save lives of Canadians and first responders
- 700 MHz is the "sweet spot"

Working together to improve public safety interoperability...

#### What we heard at CITIG #4

- This issue is important to government (Public Safety Canada, Industry Canada, Provincial EMOs, etc.)
- This issue is important to industry (various presentations and talking with exhibitors)
- This issue is important to our colleagues from the U.S.

... Is this an important issue to CITIG delegates?

CALL TO ACTION!

#### Announcing...

# The Tri-Services Special Purpose Committee on 700 MHz Broadband for Mission Critical Public Safety Data

Working together to improve public safety interoperability...

#### **Committee Struck to...**

- Formulate a broad-based public safety response to the public consultations on the use of the 700 MHz band
- Monitor and advise on the issue, inform stakeholders and identify responder spectrum needs and potential opportunities
- Engage with industry, public safety providers and different levels of government to put forward a position that makes sense for Canadian public safety and Canadians in general
- Deliver the written response for the consultation

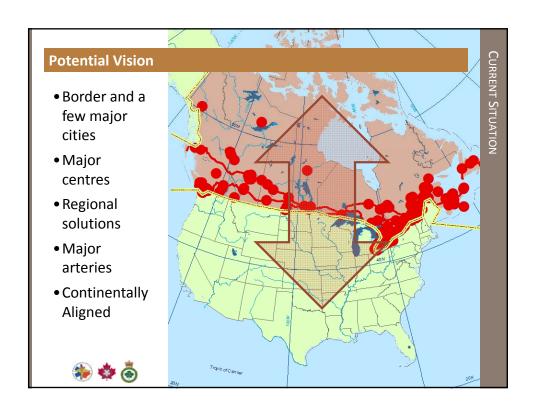

#### **Enable us to...**

- Ensure that the spectrum needs of responders and public safety in general are considered and accounted for
- Enough spectrum to fulfil vision of a robust system of interoperable networks that will benefit urban, suburban and rural responder agencies in Canada
- Alignment with U.S. with a view to a transcontinental vision
- Work with industry to help better define needs and future vision
- Advocate and work with others on a whole-ofgovernment approach

NEXT STEPS

#### www.action700.ca

• Web site created by the Associations to provide a focal point for communications efforts:

#### www.action700.ca

(download basic information, including today's media release, and sign up for e-mail updates)

• Call for **volunteers** — sign-up sheet or send e-mail to:

### action700broadband@gmail.com

(we will need technical experts, outreach, etc.)

Working together to improve public safety interoperability...

#### **Tri-Service Committee Next Steps**

- Reach out to all levels of government, public safety agencies and industry
- Engage experts to look at the future spectrum needs of public safety
- Create an awareness and mobilization campaign
- Ensure a comprehensive submission to Industry Canada that clearly outlines public safety needs by February 28, 2011

Working together to improve public safety interoperability...

5

VEXT STEP

#### What can YOU do about it?

- Get informed and put this issue on your organization's radar
- Inform your boards, municipalities, provincial/territorial governments and other governing bodies that spectrum allocations will have a significant impact on public safety in Canada
- Work with tri-services colleagues and others to advocate a strong voice for public safety in advance of spectrum allocations
- Look for and act on mobilization information as it sent by CACP, CAFC, EMSCC and others
