

The Seventh Canadian Public Safety Interoperability Workshop

“Beyond Technology:
Building a Culture of Interoperability”

November 24-27, 2013 | Vancouver, BC

Le septième atelier canadien sur
l'interopérabilité en matière de
sécurité publique

« Au-delà de la technologie :
Créer une culture de l'interopérabilité »

24-27 novembre 2013 | Vancouver
(Colombie-Britannique)

Contribution & Exhibit Package

Workshop Objective

The Seventh Canadian Public Safety Interoperability Workshop aims to again bring together a broad base of public safety and emergency management practitioners to develop a mutual understanding of the key voice and data interoperability issues facing today's public safety sector. With a focus on information exchange, topic-specific discussion and interactive break-outs, the seventh national workshop aims to support and promote the transfer of best practices and experience, and the development of a more unified approach to public safety interoperability across the country, between nations and internationally.

Once again delegates can expect to be “put to work” in extensive break-out sessions. While some of these sessions are designed to continue the implementation of the Communications Interoperability Strategy for Canada, others will focus on providing support and assistance to regional delegates as they begin, or further, the development of local, regional, provincial and inter-provincial Communications Interoperability Plans. Additional break-outs will explore other aspects of the Canadian Communications Interoperability Continuum such as creating governance models, SOPs, training and exercises and usage.

Delegates will come away with real-world insights, practical knowledge, and a common sense approach to moving forward. They will also be provided with numerous tools they can take home and begin working with immediately. The Workshop will also have hands-on sessions designed to help gain an understanding of, or work toward making progress on, key issues, including:

- National and cross-border interoperability planning
- Provincial, regional and local interoperability strategic planning
- Trends in interoperability technology, including both voice and data related issues
- 700 MHz Broadband for Mission Critical Public Safety Data & related spectrum management issues
- Next Generation (NG) 9-1-1 and its future in Canada and beyond
- Situational awareness, common/user defined operating pictures, precision information environments, GIS systems, blue force tracking & location based services
- 3D In-door Tracking and Location for Fire Fighters & public safety responders
- Social Media for Emergency Management (#SMEM)

Target Audience

Interoperability leaders & practitioners from:

- First-responder agencies (law enforcement, fire, paramedic, emergency management)
- Other public safety providers (federal, provincial, territorial, municipal)
- Military & Coast Guard
- Government agencies & utilities
- Non-governmental organizations in the emergency response and humanitarian aid sphere
- Academic and research institutions
- Industry professionals
